**EXPERIENCE:** I have 10+ years of professional experience as a broadcast/motion designer creating various video projects, marketing/infovideos and sizzle videos. Before moving into motion design, I gained 6 years experience as a graphic designer doing Print & Flash. I can carry a project from inception to completion; I am flexible; work well solo or in a creative team; can work on or off site; strong understanding of technology and formats. From brainstorming, storyboards, creating concepts, to final production, I am proficient in all aspects of the motion design creative process. Importantly, I am good with details and meeting deadlines, as well as trouble shooting and meeting client's needs.
